

Acume Billing Solutions

Built for Commercial Leaders Who Need Control, Not Just Software

Not an ERP. Not a case management platform. Not simply an invoicing tool. ABS is your commercial control layer, positioned between operations and finance.

WHAT IT ENSURES

- Every contract applied accurately and consistently
- Every entitlement validated against defined rules
- Every billing event generated accurately
- Every premium recognised appropriately over time
- Every exception surfaced and traceable
- Supplier invoices routed for approval or matched to POs

SYSTEM SEPARATION

ABS

Commercial rules and transaction construction

Acume

Invoice workflow and document delivery

ERP

Ledger management and statutory reporting

IDEAL ENVIRONMENTS

- Multi-party service ecosystems
- Complex entitlement-based programs
- Large supplier networks
- Recurring premium billing models
- High audit or compliance requirements
- Growth constrained by legacy systems

ABOUT ACUME

Streamline Business Group

Financial operations solutions since 2004 across Australasia and the Pacific.

THE COMMERCIAL PROBLEMS IT SOLVES

01 Margin Leakage

Margin erosion happens quietly through overridden entitlements, reconciliation errors, and fragmented billing logic.

- Enforces pricing matrices and SLA parameters
- No retrospective corrections or manual rework
- Validates agreement rules before transactions reach finance
- Controlled commercial execution at the source

02 Contract Complexity That Slows Growth

New OEM partners, fleet clients, custom agreements, and varied pricing models increase complexity.

- Configurable rate cards and agreement types
- Anniversary billing support
- Policy limits and renewal rules
- Commercial teams evolve without operational friction

03 Disconnected Systems

CRM manages cases, finance processes payments, billing logic sits in middleware, reporting in spreadsheets.

- Centralises commercial logic
- Becomes the contractual and pricing engine
- Preserves your CRM, finance system, and workflows
- Layers in automation where appropriate

04 Limited Entitlement Transparency

Can you instantly determine coverage, limits, utilisation, and whether an invoice is within the agreement?

- Real-time entitlement engine
- Operations and finance aligned on every transaction
- Single source of truth for all stakeholders
- Instant visibility of coverage and utilisation

How It Supports Revenue Growth

Sustainable growth requires commercial architecture designed for scale, transparency, and control.

GROWTH CAPABILITIES

Faster Partner Onboarding

- API, SFTP, CSV, and batch ingestion
- Built-in validation and audit logging
- Partnerships scale without rebuilding infrastructure

Structured Recurring Billing

- Contract-driven, policy-aware logic
- Anniversary-aligned billing
- Earned and written revenue tracked separately

Digital Enablement Without Risk

- Provider portals and customer visibility
- Structured invoice submission
- Controlled, incremental digitisation

WHAT COMMERCIAL MANAGERS VALUE MOST

Control Without Micromanagement

- Deterministic pricing enforcement
- Clear audit trails
- Structured exception handling
- Governed approval workflows

Scalability Without Fragility

- Multi-source fleet ingestion
- High invoice volumes
- Complex entitlement models
- Multiple client pricing structures

Clear Accountability

- ABS owns commercial rules
- Acume owns invoice workflow
- ERP owns the ledger
- Shadow systems eliminated

WHAT CHANGES FOR YOU

INSTEAD OF MANAGING

Spreadsheets and exception emails
Backend data corrections
Manual reconciliation

YOU FOCUS ON

Contract strategy and pricing evolution
Client relationships
Margin performance

By centralising contractual logic, enforcing pricing deterministically, and aligning operations with finance, ABS transforms complexity into **structured capability**. This is how you scale without compromise.

See it in action.

We'll show you how ABS protects margin, structures billing, and scales commercial operations.
