

The Acume Platform

Purpose-Built Financial Automation Solutions

Designed to solve the financial processing bottlenecks of today while delivering the automation technology for tomorrow. eInvoicing and PDF extraction combined into a single configurable workflow.

ABOUT ACUME

Experience You Can Trust

Part of Streamline Business Group. Deep experience in back-office process automation since 2004, reducing costs, eliminating errors, and improving productivity across Australasia and the Pacific.

WHAT YOU GET

- Reduced processing time and costs
- Automated business rules, fewer errors
- Greater productivity and capacity
- Structured workflows and approvals
- Full audit trail on every transaction
- eInvoicing via the Peppol network

INTEGRATIONS

Xero, MYOB, X2 Framework, Costar, Abel, and a growing list of accounting and ERP platforms via API or SFTP.

PEPPOL INVOICING

Peppol is a global standardised framework for electronic invoicing, adopted by the NZ and Australian governments. Acume connects your business to the Peppol network for direct transfer of invoice data between accounting systems.

THE PLATFORM

AP Accounts Payable

eInvoicing and PDF data extraction combined into a single configurable workflow. One place to process all invoices received from your suppliers.

- Automated preparation, processing, and approval
- Eliminate errors and double-handling
- Unlimited e-invoice storage
- Configurable workflow and approval routing
- Never misfile, misplace, or lose an invoice
- PO matching and 3-way validation

AR Accounts Receivable

High-volume B2B billing with eInvoice sending and automated payment reconciliation via bank feeds.

- High volume billing workflow for enterprise
- Easily view invoices sent to customers
- Bank feed integration for payment reconciliation
- Integrates with your current ERP or AP system

PO Orders

Replace your paper-based PO system with structured digital purchase order management. Control spend before it happens.

- Manage approvals before orders reach suppliers
- Track purchase order process and spend
- Simple, configurable interface
- Integrates with your existing accounting system

EX Expense

Mobile expense claim management. Snap a photo, record details, dispose of paper receipts.

- User-friendly, intuitive platform
- No software required
- Available anywhere with an internet connection
- Scales as your business grows

eInvoicing Is the Future. Acume Holds the Key.

The direct transfer of invoice data between accounting systems via the Peppol network. No printing, no email, no manual handling. Acume connects your business to the network without expensive ERP upgrades.

THE DIFFERENCE

TRADITIONAL INVOICING

Manual handling by both parties

Supplier prints or emails a PDF. Customer receives via mailroom, email, or post. Manual registration, data entry, matching, and filing. Error-prone at every step.

Supplier → Print/Email → Post/Internet → Mailroom → Registration → Data Entry → Accounts Payable

EINVOICING VIA PEPPOL

Direct data transfer, zero manual handling

Invoice data flows directly from supplier's accounting system to customer's accounting system via the Peppol network. No paper, no email, no re-keying. Validated and structured from source.

Supplier Acume → Peppol Network → Invoice Data → Customer Acume → Accounts Payable

WHAT ACUME DELIVERS

Reduced Costs

- Less time tied up with manual processing
- Eliminate paper handling and storage
- Fewer corrections and rework cycles

Fewer Errors

- Automated business rules enforcement
- Structured data from source, not re-keyed
- Duplicate detection and validation

Greater Productivity

- Free staff for higher-value work
- Configurable workflows reduce bottlenecks
- Scale without increasing headcount

Integrations

Acume integrates with Xero, MYOB, X2 Framework, Costar, Abel, and a growing list of accounting and ERP platforms. Our API and SFTP connections mean Acume works alongside your existing systems without expensive upgrades.

See it in action.

Ready for the speed, accuracy, and cost savings of automated financial processing? We'll walk you through the full platform.
