

Why Acume's Pricing Delivers Immediate & Measurable ROI

A CFO-ready business case for implementation and BAU costs. Low friction, fast ROI, and strong financial governance.

MANUAL COST PER INVOICE

\$27 – \$30

3–12 minutes of AP time, rework, corrections

ACUME COST PER INVOICE

\$3 – \$9

All-in, including approval and matching

THE BUSINESS CASE

01 Rapid Time Savings & Cost Reduction

- Manual handling costs \$27–\$30 per document (3–12 min AP time)
- Acume reduces processing to 20–90 seconds, \$3–\$9 per document all-in
- 50–80% reduction in AP processing cost from day one

500 invoices/month: \$13,500–\$15,000 internal cost vs \$1,500–\$4,500 with Acume.

02 Eliminates High-Impact Financial Risk

- Duplicate invoice prevention
- Incorrect supplier payment detection
- Wrong coding and cost allocation prevention
- PO mismatch flagging
- Audit failure and compliance gap elimination

One prevented \$5k–\$20k incorrect payment = full year of Acume BAU covered.

03 Predictable, Transparent Cost Structure

- Simple integrations: \$2,000 one-off
- Enterprise multi-entity: \$10–20k
- \$104 per entity support
- Volume-based pricing (\$1 → \$0.85)

No seat licences. No platform fees. No hidden charges. Costs scale with activity, not headcount.

04 Enterprise Controls, Not Enterprise Price

- Native 3-way matching
- Supplier master data validation
- Audit-ready trails
- Delegated financial authority and approval workflows
- Multi-entity governance included

Competitors charge 2x–4x for similar capability.

05 Fast Deployment = Fast Payback

- Xero/MYOB configuration in 2–5 days
- First-month assisted processing accelerates adoption
- Full cost recovery within 30–60 days

Often cash-flow positive by the second month of use.

06 Strategic Value Beyond AP

- Improved spend visibility
- Better forecasting accuracy
- Stronger supplier relationships
- Reduced audit effort
- Data quality uplift across finance functions

Bottom Line for CFOs

Acume replaces a \$27–\$30 internal cost with \$3–\$9 automation and removes compliance risk at the same time. The model is built for CFOs: low friction, fast ROI, and strong financial governance.

Smarter AP. Better control. Lower risk.
